Jesús Molina

PhD, general health psychologist, and psychotherapist at EDAI. Teaching collaborator at the University of Barcelona. His research interests focus on early intervention, Dynamic Interpersonal Therapy (DIT), and Mentalization-Based Therapy (trained at The Anna Freud Centre-EDAI School).

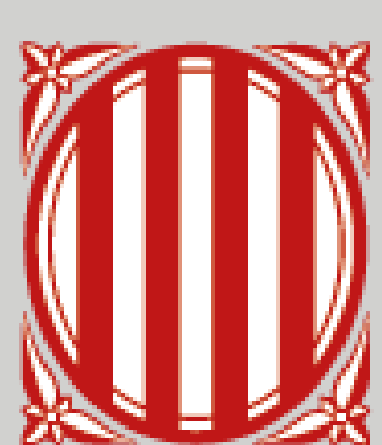

Mari Ángeles Cerezo

Professor at the University of Valencia and specialist in Clinical Psychology. Her current area of expertise focuses on the predictors of child attachment through dynamic analyses and on programs promoting child well-being and emotional security.

Bàrbara Viader

Occupational therapist and director of the Centre d'Estimulació Infantil de Barcelona (CEIB). She specialized in pediatrics, education, and sensory integration. Lecturer at national and international universities, including the Postgraduate Program in Sensory Integration at the Autonomous University of Barcelona (UAB).

EDAI Research & Development Awards

Supporting and enabling science

The EDAI R&D Awards are our proposal to promote and encourage research and development in the field of neurodevelopment and child and youth mental health, both nationally and internationally. Participants come from the areas of neuropediatrics, neonatology, psychiatry, psychology, psychotherapy, neuropsychology, speech therapy, social work, social education, physiotherapy, occupational therapy, psychomotricity, pedagogy, or educational psychology, among others.

The scientific poster competition takes place within the framework of the EDAI International Conference, where the selected posters are exhibited. The two winning posters receive financial support and are presented during the plenary session of the EDAI International Conference.

Venue

Registration
